Summary

Data scientist skilled in implementing machine learning to solve business problems. Experienced with big data processing, modeling, interpretation, and project management.

Skills

Computer skills: Numpy, Pandas, Scikit_learn, Seaborn, Matplotlib, Python, Linux, and SQL.

Data science: Feature engineering, Dimensionality reduction, Supervised/Unsupervised learning, NLP, and Deep learning.

Projects

Lithofacies classification using machine learning: [Link](#)

- Implemented supervised learning algorithms for rock facies classification
- Designed a T-test flow to evaluate the prediction performance of supervised learning algorithms
- Tech: T-test, support vector machine, gradient boosting, random forest, and KNN

Shill bidding detection on eBay: [link](#)

- Implemented unsupervised clustering to group auction records on eBay
- Created a “voting” algorithm followed by supervised classification to identify 6 % shill bidding from all auctions
- Tech: PCA, TSNE, UMAP, KMeans, agglomerative clustering, and Gaussian mixture modeling

NLP on scientific articles for information retrieval: [link](#), [web-APP](#)

- Pre-processed documents containing titles and abstracts, and created a vector space model
- Retrieved information based on vector similarity and built a web query APP
- Tech: spacy, TF-IDF, and word2vec

Experience

CGG

Houston, TX

Data Scientist / Geophysicist

11/2011 - Current

- Managed the high-quality and on-time completion of data processing and modeling project in offshore Trinidad.
- Drove the development of more reliable modeling workflows leading to highly improved 3D reservoir imaging.
- Organized workshops gaining insight into data acquired by up-to-date techniques.
- Led the production of highly reconstructed data and 3D subsurface imaging in 10+ projects.
- Incorporated researches on data anomaly detection and target feature picking using neural network algorithms.

MICHIGAN TECHNOLOGICAL UNIVERSITY

Houghton, MI

Post-Doctoral Associate

09/2009 – 05/2011

- Acquired the diffraction data of microstructures inside the memory alloy using the high energy synchrotron beam.
- Identified the key factor degrading the performance of the memory alloy using computational simulation.

THE HONG KONG POLYTECHNIC UNIVERSITY

Hong Kong, China PR

Research Assistant Scientist

03/2005 – 06/2006

- Acquired image data of piezoelectric microstructures in the nanometer scale.
- Implemented linear regression to obtain the optimal features of piezoelectric microstructures for device applications.

Education

THINKFUL

01/2021

Certificate in Data Science

- Enrolled intensive data science programs focusing on Python, Pandas, statistical analysis, and supervised/unsupervised machine learning.
- Collaborated every week with a senior data scientist to learn industry best practices.

VIRGINIA POLYTECHNIC INSTITUTE AND STATE UNIVERSITY

Ph.D. in Materials Science and Engineering

07/2009

- Dissertation: Electropolishing of Niobium in Sulfuric Acid-Methanol Electrolytes: Development of Hydrofluoric Acid-Free Electrolytes.

THE HONG KONG POLYTECHNIC UNIVERSITY

M.Phil. in Applied Physics

10/2004

UNIVERSITY OF SCIENCE AND TECHNOLOGY OF CHINA

B.E. in Manufacturing and Design Automation of Machinery
